

On-board Internal Loudspeaker

Loudspeakers can be installed in the cab, saloon, and outside the train. They can provide information broadcasts such as operation information, safety tips, and emergency notifications to passengers inside the train and on the platforms. Moreover, they enable the driver to monitor the broadcasts and intercoms.

Technical Parameters

Items	Specification
Directivity	Conical linear radial type
Rated Power	5W
Rated Resistance	8Ω
Rated Harmonic Distortion	1% (1kHz, 5W)
Frequency Response	200Hz~15kHz ≤ ±3dB
Rated Resonance Frequency	85Hz±20%
Rated Characteristic Sensitivity	88±3dB
SNR	≥ 75dB
Type	constant voltage transmission / constant impedance transmission

* The listed parameters are standard configurations and supports customized development.
